Energy Star®

Schell Brothers is a proud builder of Energy Star homes.

To earn the Energy Star, a home must meet strict guidelines for energy efficiency set by the U.S. Environmental Protection Agency. These homes are at least 15% more energy efficient than homes built to the 2009 International Residential Code (IRC), and include additional energy-saving features that typically make them 20–30% more efficient than standard homes.

As a builder of ENERGY STAR qualified homes, Schell Brothers have included these ‘tried-and-true’ energy-efficient features that contribute to improved home quality and homeowner comfort, and to lower energy demand and reduced air pollution:

1. Effective Insulation

Properly installed and inspected insulation in floors, walls, and attics ensures even temperatures throughout the house, reduced energy use, and increased comfort.

2. High-Performance Windows

Energy-efficient windows employ advanced technologies, such as protective coatings and improved frames, to help keep heat in during winter and out during summer. These windows also block damaging ultraviolet sunlight that can discolor carpets and furnishings.

3. Tight Construction and Ducts

Sealing holes and cracks in the home’s “envelope” and in heating and cooling duct systems helps reduce drafts, moisture, dust, pollen, and noise. A tightly sealed home improves comfort and indoor air quality while reducing utility and maintenance.

4. Efficient Heating and Cooling Equipment

In addition to using less energy to operate, energy-efficient heating and cooling systems can be quieter, reduce indoor humidity, and improve the overall comfort of the home. When properly installed into a tightly sealed home, this equipment won’t have to work so hard to heat and cool the home.

5. Efficient Products

ENERGY STAR qualified homes may also be equipped with ENERGY STAR qualified products — lighting fixtures, compact fluorescent bulbs, ventilation fans, and appliances, such as refrigerators, dishwashers, and washing machines.

6. Third-Party Verification

With the help of independent Home Energy Raters, ENERGY STAR builder partners choose the most appropriate energy-saving features for their homes. Additionally, raters conduct on site testing and inspections to verify the energy efficiency measures, as well as insulation, air tightness, and duct sealing details.

Siding

Nothing beats vinyl for sheer endurance and since it requires far less maintenance than painted surfaces it has surpassed wood in popularity for new construction. Crane vinyl siding offers design versatility with an unmatched variety of styles and colors.

Siding

Crane Shake Accents

Ageless beauty meets endless performance. With Portsmouth Shake™ you can give a home the distinctive charm and appeal of authentic cedar shingles without imposing on today's maintenance-conscious homeowner the cost or inconvenience of caring for real wood. Put Portsmouth Shake on your gables, dormers, or even on the entire home for a unique look that's guaranteed maintenance-free.

**Crane Shake Accents are in predetermined locations and vary per plan.*

Tamko Heritage 30-Year Shingles

Heritage 30-year shingles feature a unique Shadowtone granule blend that adds depth of appearance. They are listed by U.L. for wind and Class A fire resistance for maximum protection of your home. Heritage 30-year self-sealing shingles give you the best of both worlds – a rustic look with fiberglass durability and protection.

- Excellent for new construction.
- Shadowtone granule blend adds depth of appearance to simulate the dimensional look of wood shakes.
- Improves the look and value of your home without the high costs or liabilities associated with wood.
- Tough, laminated, double-layer, random-cut design. Made with Tamko's own fiberglass mat, Heritage 30-year shingles are the highest quality laminated shingles in their class. Backed by a 30-year limited warranty, 5-year Full Start, limited transferability, and a 60-month limited warranty against damage from wind up to 70 mph.

Colonial Red

Classic Copper

Regal Blue

Medium Bronze

Metal roofing's attributes are impressive. Durable and long lasting, a metal roof requires little maintenance, is available in a wide range of colors and is fire resistant. A standing seam roof is constructed of many interlocking panels that run vertically from the roof's ridge to the eave. The interlocking seam where two panels join together is raised above the roof's flat surface, allowing water to run off without seeping between panels.

**Printed colors may vary from actual material. Other colors may also be available.*

*Courtyard Features

Water Feature

This optional water feature creates a serene atmosphere in the courtyard. The combination of pavers and unique rocks add a new dimension to your living space!

Trellis

The trellis creates an outdoor dining area. Just think how beautiful your hanging plants will look in full bloom over your dining table.

BBQ Grill & Santa Cecilia Granite Countertop

If you enjoy cooking for family and friends, then the BBQ Grill and countertop is a great feature for you to have! This Cal Flame Four Burner Grill with a single side burner allows for plenty of space for food! The base is Ameristone Stucco in Stony Creek finish and has a 27" single door. We have included with the grill, a spacious countertop finished with Santa Cecilia Granite that provides a classy element to dress up your outdoor space even more!

Fireplace

The focal point of your outdoor living room, is the fireplace. It allows the interior of your home to carry over to the outside. Family and friends can gather around the fire for good conversation, or you can prop your feet up and relax by the fire yourself. This outdoor living space was designed for the way you live - indoors and out!

Shutters

Mid America's Master Shutter®

- More 16 designer colors to compliment any home

Your Hardwood Floors

Expansion and Contraction

Hardwood is a natural product composed of natural woods. All wood expands and contracts with temperature and moisture. The higher the temperature and moisture content the greater the expansion. In the summer, if windows are left open in your home and/or the A/C is left off, the wood in your home will expand due to temperature and the humidity in the air. This may cause your wood to buckle. During the winter months, the dry cool air will cause your hardwood to contract, leaving noticeable gaps between the boards. This is a common problem with hardwood in all homes but is more noticeable in seasonal homes where the temperature/humidity is not kept constant by the HVAC system year round. Many of the problems caused by expansion and contraction can be greatly reduced by using the floating hardwood installation method discussed below.

Engineered vs Solid Hardwood

Solid Hardwood is composed of one solid layer of the same hardwood from top to bottom. It is typically 3/4" thick and is best installed using the nail down method. Engineered hardwood is composed of a thin solid layer of hardwood on the top with multiple cross ply layers of wood beneath. Engineered wood is typically glued down or floated (more on floating floors below). It is important to recognize that engineered hardwood is real hardwood and is not Pergo or laminate. Because of its cross ply construction, engineered hardwood tends to expand and contract less than solid hardwood, making it a more suitable choice for seasonal homes and homes in humid climates. In addition, engineered hardwood is the best and often the only choice for installation on a concrete subfloor since you obviously can't nail down solid hardwood into concrete (or gypcrete). One final advantage of engineered hardwood is it requires much less hardwood than solid hardwood and is thus more environmentally friendly.

Refrigerators

GE® Energy Star® 21.0 Cu. Ft. Top-Freezer Refrigerator

Approximate Dimensions: 66-3/4in x 32-1/2in x 32-3/4in

- 32-3/4" Wide
- Upfront temperature controls - Easy-to-use controls regulate both fresh food and freezer sections.
- Adjustable spill-resistant glass shelves - Designed to contain spills for easy cleaning.
- Snack drawer - Conveniently stores favorite foods and allows for quick, easy access.
- Adjustable-humidity drawers - Controls help food stay fresh.
- Factory-installed icemaker - Refrigerator comes ready to automatically create ice.
- Wire freezer shelf - Provides additional storage for frozen foods.

GE® Energy Star® 25.3 Cu. Ft. Side-By-Side Refrigerator with Dispenser

Approximate Dimensions: 69-3/4in x 33-5/8in x 35-3/4in

- 35-3/4" Wide
- Adjustable slide-out, spillproof glass shelves - Raised edges help contain spills, holding up to 12 ounces of liquid, to make cleanup quick and easy.
- Snack drawer - Conveniently stores favorite foods and allows for quick, easy access.
- Adjustable-humidity drawers - Controls help food stay fresh.
- Adjustable-temperature drawer - Helps keep your favorite food items cold and ready to eat.
- Adjustable gallon door bins - Offers ideal space for storing gallon containers in the door.
- Advanced filtration - Removes trace pharmaceuticals from water and ice* and uses replacement filter MWF (*Replaces ibuprofen, atenolol, fluoxetine, progesterone, and trimethoprim. These pharmaceuticals are not necessarily in all users' water.)

**All GE Appliances have a 3 year warranty (1 year standard GE Factory Service Warranty with an additional 2 years extended warranty). Picture of Appliances are shown in upgraded Stainless Steel. Please see your design consultant for more details.*

GE® 22.1 Cu. Ft. Bottom-Freezer French-Door Refrigerator

Approximate Dimensions: 68-1/2in x 34-7/8in x 32-3/4in

- 33" wide
- Upfront temperature controls - Easy-to-use controls regulate both fresh food and freezer sections.
- Two clear drawers.
- Snack drawer - Conveniently stores favorite foods and allows for quick, easy access.
- Adjustable glass shelves - A variety of shelf configurations provide additional options for food storage.
- Adjustable gallon door bins - Offers ideal space for storing gallon containers in the door.
- Two-level freezer baskets - Baskets allow easy access to frozen foods.

GE® Energy Star® 22.1 Cu. Ft. Bottom-Freezer French-Door Refrigerator with Internal Water Dispenser

Approximate Dimensions: 68-1/2in x 34-7/8in x 32-3/4in

- 33" wide
- Internal water dispenser with GE water filtration - Delivers filtered water with one touch.
- Factory - installed icemaker - Refrigerator comes ready to automatically create ice.
- Upfront temperature controls - Easy-to-use controls regulate both fresh food and freezer sections.
- Two clear drawers.
- Snack drawer - Conveniently stores favorite foods and allows for quick, easy access.
- Adjustable glass shelves - A variety of shelf configurations provide additional options for food storage

**All GE Appliances have a 3 year warranty (1 year standard GE Factory Service Warranty with an additional 2 years extended warranty). Picture of Appliances are shown in upgraded Stainless Steel. Please see your design consultant for more details.*

Refrigerators

GE Profile™ Series Energy Star® 23.1 Cu. Ft. French Door Ice & Water Refrigerator

Washers & Dryers

GE® 5.0 DOE Cu. Ft. Capacity Washer with Stainless Steel Basket & Steam

Approximate Dimensions: 44-1/2in x 29in x 28in

- SmartDispense™ technology - The washer can hold about a two-month supply of detergent and fabric softener and automatically dispense the right amount for each load.
- Steam Assist - Penetrates deep into fabric fibers, loosening stains like tomato and grass, yet protects your fabrics.
- Wash Action Waterfall - Loads receive thorough coverage with this waterfall that combines with a recirculation pump to move water and detergent through clothes.
- Stain Removal Guide - Easily eliminate tough stains with preprogrammed settings that modify your cycle to treat the four most common stains.
- Soft-close glass lid - The convenience of hydraulic technology allows the lid to close gently every time.
- LED washer basket light - Find every last sock with a bright LED light that effectively lights the wash basket.
- Clean Speak Communication System - Perfect drying performance is achievable thanks to the ability of the washer to communicate with the dryer to preset the dry cycle.

GE® 7.8 Cu. Ft. Capacity Electric or Gas Dryer with Stainless Steel Drum & Steam

Approximate Dimensions: 44-1/2in x 31-9/10in x 28in

- Steam Select - For the best results, customize your cycle by specifying the number of garments needing to be steamed.
- Steam Refresh - Rejuvenate lightly worn clothes by getting rid of wrinkles and odors with this convenient setting using the power of steam.
- Steam Dewrinkle - Stored or wrinkled clothes come out wrinkle-free with this helpful setting that uses steam to refresh and dry a load of any size.
- HE Sensor Dry - Keep your clothes looking and feeling their best. Dual thermistors continually monitor temperature with a sensor bar that measures moisture to prevent over-drying.
- Clean Speak Communication System - Perfect drying performance is achievable thanks to the ability of the washer to communicate with the dryer to preset the dry cycle.
- My Settings - Dry clothes with the settings you prefer on any cycle, rather than the defaults, and store your settings for later use.
- 5 heat selections - Provide the right temperatures for your clothes-drying needs.

**All GE Appliances have a 3 year warranty (1 year standard GE Factory Service Warranty with an additional 2 years extended warranty). Picture of Appliances are shown in upgraded Metallic Carbon. Please see your design consultant for more details.*

Washers & Dryers

GE® Energy Star® 4.1 DOE cu. ft. Capacity Frontload Washer with Steam

Approximate Dimensions: 39-7/8in x 33-5/8in x 27in

- Stain Wash Cycle - Tackles the toughest stains, from fresh grass marks to food spills.
- Internal water heater - Boosts water temperatures and helps achieve sanitization.
- Steam Assist - Penetrates deep into fabric fibers, loosening stains like tomato and grass, yet protects your fabrics.
- eWash Cold Water Technology - Energy-saving option uses a cold water wash on select cycles without sacrificing performance.
- Bulky Bedding cycle - Washes larger items, such as comforters, blankets and jackets.
- Energy Star® qualified and CEE Tier III - Meets or exceeds federal guidelines for energy efficiency for year-round energy and money savings.
- Vibration Control - Adjusts spin patterns for each floor type for a smoother wash without walking on shaking.

GE™ 7.0 cu. ft. Capacity Electric or Gas Dryer with Steam

Approximate Dimensions: 39-31/100in x 32-187/1000in x 27in

- Dura Drum Interior - Provides long-lasting dependability.
- HE Sensor Dry - Keep your clothes looking and feeling their best. Dual thermistors continually monitor temperature with a sensor bar that measures moisture to prevent over-drying.
- Steam Dewrinkle - Reduces wrinkles and freshens clean clothes.
- Speed Dry - Quickly dries items and small loads for families on the go.
- eDry™ option - Energy-saving option reduces dry temperatures on select cycles without sacrificing performance.
- Bulky Bedding cycle - Dries larger items, such as comforters, blankets and jackets.
- Vibration Control - Adjusts spin patterns for each floor type for a smoother wash without walking on shaking.

GE® Pedestals

- 13" Pedestal - Raises the dryer and washer to a comfortable working level
- Storage drawer - Provides storage for laundry additives or accessories
- Stainless Steel Ball Bearings - Allows easy gliding for drawer operation
- Easy Installation - All installation parts are included with pedestal

**All GE Appliances have a 3 year warranty (1 year standard GE Factory Service Warranty with an additional 2 years extended warranty). Please see your design consultant for more details.*

Guardian Home Technology

Dear New Homeowner:

Congratulations on the purchase of your new home!

Schell Brothers has selected Guardian Home Technologies as their Professional Low-Voltage Wiring and Security Specialist.

As a standard enhancement to your new home, your builder is including high technology wiring for your telephone, high-speed Internet, and video outlets which will increase your enjoyment of your new home and enhance its value. The On-Q/ Legrand Home Services Center replaces standard telephone and TV wiring, forming the electronic foundation for multi-line phone, fax, DSL, high-speed Internet, cable modems, DSS satellite, HDTV, computer networking and whole-house audio and video distribution.

Your family's life safety is an important consideration in the construction of your home. As a valued preferred builder customer, you can receive – at no charge – a fully installed state-of-the-art security system* (valued at \$1465) when you sign up for our standard monthly monitoring agreement.

Please expect to meet with a Guardian representative during your Design Center appointment to select your desired locations for your standard phone and cable outlets, as well as any other options that may interest you and your family.

In the meantime, feel free to explore our technology web site at www.guardianhometechnologies.com to become acquainted with all the exciting products you have available to install in your new home. We look forward to meeting with you in the near future.

Sincerely,

Paul Coleman
Salisbury Home Technology Sales Manager

HOME TECH &
GENERAL INFO

VHC Customer Selections Guide

General Information

Characteristics of Natural Stone

- Marble, granite and other natural stones are products of nature. As such, they have natural characteristics such as pitting, veining, fissures, fractures, natural flaws, etc.
- Not all colors, flow, movement, and marking will be uniformly present in every piece of granite and marble, even of similar type and variety. These unique characteristics enhance the beauty of natural stone.

Carpeting

- Carpet is produced in a variety of widths, most being 12', 13'6" or 15'. Due to this fact, seams are an inevitable part of the installation process. Some seams will be apparent despite the level of skill employed in the installation.
- Any "pull" or loose thread in your carpet should be carefully tucked back into the carpet or cut cleanly with a pair of scissors. Never pull on a loose thread.

Other

- Nail pops in the walls of your unit and cracks in between pieces of trim are expected products of construction and will be repaired after your 11 month service request. Should you choose to paint your unit after settlement, this component of your warranty no longer applies.

Solar Power Panels

Solar power panels can only be installed on homes that meet the proper specifications of building location and direction. If you are interested in the installation of solar panels on your home please contact our selections coordinator for more details.

Insulated Garage

- Includes R13 BATT insulated walls
- Insulated garage door also available

The Schell Brothers Difference

At Schell Brothers, we pride ourselves on providing you with the highest quality home and the best service in the industry. This dedication to quality and service has been guiding the company since its conception. Simply put, Schell Brothers was founded upon the premise of creating a “better” builder. At Schell Brothers, our performance is measured by the happiness of our customers, not by profit. We are true believers in the philosophy that if our home buyers are happy, financial success will follow. To achieve our goal of being the best builder in the area, everything we do is guided by the principles of what we call The Schell Brothers Difference.

The Schell Brothers Difference begins with quality construction. While many construction companies focus on maximizing profit by using cheaper materials, our philosophy is exactly the opposite. We are constantly searching for ways to provide our buyers with better materials and higher quality construction while maintaining affordable prices. At Schell Brothers, we ask ourselves “What would our customer want?” Applying this philosophy, we strive to provide the highest quality home possible, even if it means making a smaller profit.

The Schell Brothers Difference extends beyond the quality materials used to build each one of our homes. We know that one of the keys to success is communicating effectively with our home buyers every step of the way. The journey begins when you meet with the Schell Brothers Selections Coordinator at our design center to choose the features that will personalize your home. Then, prior to the start of construction, we invite you to meet the Project Manager on-site to review the selections for your home and to learn about the home-building process. All home buyers are also given the opportunity to visit their home during the pre-drywall stage in order to ensure that wiring for phone, cable, and other home media options are placed just as you want them.

The Schell Brothers Difference doesn’t end when you move into your new home. Schell Brothers has an entire Customer Service department dedicated to serving our home owners after construction is complete. Our Customer Service department was given the directive of keeping our customers happy no matter what it takes. We realize that your home may need some repairs and tweaking from time to time. In order to address these issues quickly and thoroughly, the Schell Brothers Customer Service department is staffed with qualified tradesmen ready to respond at a moment’s notice.

We are honored that you have selected Schell Brothers to build your next home. Schell Brothers is not only proud of the quality of the homes we build, but also of the strong relationships that we build along with them. As a new home buyer, we welcome you to the Schell Brothers family and are thrilled to share the Schell Brothers Difference with you.
