SCHELLTER™

ADVANCED BUILDING SCIENCE

SMART TECHNOLOGY DEVELOPED BY SCHELL BROTHERS TO PROVIDE YOU WITH THE ULTIMATE HIGH PERFORMANCE HOME.

Schellter™ Advanced Building Science was developed as part of our continual commitment to provide our homeowners with an exceptional home worthy of the Schell Brothers name and reputation. Schellter is comprised of three components: Enerwize™, SanctuAIR™, 4Tress™, and HomeIQ™. Our goal was to use a scientific process to create a new type of home – a home that is extremely energy efficient (Enerwize), eliminates the health risks associated with poor indoor air quality (SanctuAIR), provides unparalleled durability, longevity, strength, and quality (4Tress) and offer the ease Smart living with everything at your fingertips (HomeIQ™).

BREATHE EASY WITH SANCTUAIR™.

Sleep better knowing that your home is protected by SanctuAIR™, the ultimate in healthy air quality. The high SanctuAIR™ standards exceed the requirements of the Environmental Protection Agency's Indoor AirPLUS® program, placing our homes in the top 10% in the nation for air quality. That's right, the air quality in your home will be better than 90% of the homes in the country! We use low VOC (Volatile Organic Compound) building products and MERV-13 air filters. A MERV-13 Filter will remove almost all of the harmful particles in the air.

RELAX IN A 4TRESS™ ENVIRONMENT THAT IS BUILT TO STAND THE TEST OF TIME.

A home built 4tress™ strong will last longer, require fewer repairs, and provide you with more time for the things you love. Advanced framing techniques that include 2 × 6 exterior walls*, engineered flooring systems, waterproofing techniques, and a five check leak prevention system place your home among the most durable in the nation. All 4tress™ homes meet stringent requirements for strength, durability, moisture resistance, and sound attenuation.

*Some garage exterior walls use 2x4.

SAVE TIME, ENERGY AND MONEY WITH ENERWIZE™.

Enerwize™ sets a new standard for home energy efficiency by far surpassing the requirements and efficiency ratings of homes built to Energy Star specifications. While all Schell Brothers homes are also Energy Star certified, the addition of Enerwize™ features and technology yields homes that are approximately 50% more energy efficient than a typical Energy Star certified home. In addition, Enerwize™ homes are over 100% more energy efficient than the average existing home, which means an Enerwize™ home will have energy costs that are less than half those of an equivalently sized existing home. By buying an Enerwize™ home, you're not only saving money, you're helping our environment by reducing the carbon footprint of your home.

The EnerWize™ brand is synonymous with comfort, savings, and peace of mind. Features such as High Performance air conditioners, variable speed blowers, tankless water heaters, specially sealed ducts, and proprietary techniques combine to provide an average HERS (Home Energy Rating System) score of 49. That means you can expect a utility bill that will be about 51% less than a typical existing home.

enerwize™
ENERGY OPTIMIZED

HERS SCALE
The Home Energy Rating System (HERS) measures a home's energy efficiency.

Schell Brothers averages 49 on the HERS Scale, making our homes some of the most energy efficient in the country.

STRUCTURAL FRAMING

EXTERIOR WALLS

Exterior walls* are constructed utilizing Advanced Framing Techniques that include: 2" x 6" walls with studs spaced 24" on center, right sized insulated headers and wall corners/intersections that allow for full cavity insulation.

FLOOR SYSTEM

Constructed of engineered open-web floor trusses per plan. All sub-flooring has a 3/4" tongue and groove sub-floor.

ROOF SYSTEM

Engineered roof trusses with energy heels provide adequate space for extra insulation.

GREEN OPTIONS

SOLAR POWER PANELS

Solar power panels may only be installed on homes that meet the proper specifications of building location and direction. If you are interested in the installation of solar panels on your home please contact our Sales Team for more details.

*Scan the QR
code to get
started*

CLEAN ENERGY USA

Clean Energy USA has installed over 1,700 solar panel systems since 2007, making it Delaware's premier provider. Solar energy's benefits include reducing or even eliminating your electric bill, protecting you from power companies' rising rates, and solar tax incentives to help you recoup much of your upfront investment quickly and reduce your tax bill (or increase your refund) at the end of the year. Visit **ceusa.com** for more information.

ONLINE DESIGN STUDIO

Making all of the choices for your new home is exciting, but can also be a daunting task.
